# NAVWAR 1:3000th scale WARSHIPS AND MERCHANT SHIPS

NAVWAR 1:3000th ships are fine metal castings which can easily be painted using ordinary enamel paints. Each packet contains either one model or the number shown after the ships name, and is supplied with a data sheet.

GENERAL QUARTERS 1 Rules are ideal for wargaming with these ranges for W.W. 2, (GENERAL QUARTERS 2 rules covering W.W.1., are currently out of print), whilst STEAM and STEEL are the set for the Pre-Dreadnought era. Modern naval combat is covered by Warship Commander Rules. All of these rules are listed on page 1.

The headings for the ships listed in this catalogue contain the following information:-

"Number" is Navwar's identification number for that model or pack.

"Class" relates to number of ships built in class to the design of the model + no of vessels planned or projected.

"Date" refers to the date the vessel was built (or planned) to the design depicted by the model.

Each pack contains one ship unless shown otherwise.

The "price" is per pack.

An asterisk (\*) after the ships name indicates that separate sails are included.

*Names printed in italics relate to ships that are sister ships of vessels built by another nation or which have been transferred or acquired and which are also listed under the original nation. The listing of these ships under the second nation is for information only.*

e.g. N285 *Drummond* shown under Argentina relates to the French frigate N285 D'ESTIENNE D'ORVES. The model does not differ and the information included with the model relates to its country of origin.

e.g.

NUMBER	NAME	CLASS	DATE	PRICE

Hence pack no N1503 contains two Later Battle class destroyers and costs £1.10. There were 8 vessels built to this design plus 16 planned and the first vessels were available in 1945.

## WOODEN WALLS

Our range of 1/1200th scale sailing ships now includes Chinese Junks, as well as the Elizabethan era, American War of Independence, The Seven Years War, The War of the Spanish Succession, all three of the Dutch Wars, and the Napoleonic Period. It should be remembered that precise details of ships become more difficult to obtain the earlier we go back. Few 18<sup>th</sup> Century vessels, nominally in the same class, were built to exactly the same plans, and with refits and rebuilds, vessels which started out as near sisters, could often end their lives looking very different. This is even more true for the Tudor era where scholars continue to argue about details of individual ships. Paintings of ships of the period are often described as different vessels by different authors. We continue to choose models that are typical of a particular class or type at a particular date, rather than provide ranges of near identical half sisters. The division of the range into "Napoleonic and American Independence", "Dutch Wars to Seven Years War" and "Armada" is purely arbitrary. Vessels from either side of the "divide" may be used together.

**ROUNDWAY - FROM MEDIEVAL TO RENAISSANCE - LATE 15TH & 16TH CENTURY**

This range of 15mm figures covers the last years of the Medieval era and the first of the Renaissance era. From the final battles of the Wars of the Roses, through the conflicts between France and Burgundy and the emergence of the Swiss as a major fighting force. German forces of the Emperor took part in most of these wars whether for their own master, as mercenaries or as specialists manning the artillery. Although each figure is categorised as belonging to a particular country, many soldiers served in armies other than their own, styles were copied and the wealthy bought armour from great armourers, irrespective of nationality.

**PRICE £1.50 PER PACK**

Each infantry pack contains 8 figures, Command packs 6 figures, Cavalry packs 4 troopers and horses, Command packs 3 figures and horses. Other packs as shown.
